

Founded in 1992, **CROS NT** is a data-driven Contract Research Organization (CRO) providing services from feasibility to clinical study reporting for Phases I-IV and medical device trials.

CROS NT's services include regulatory consultancy, monitoring, data management, biostatistics programming & analysis, pharmacovigilance and medical writing – and accompanying eClinical applications (data visualization, EDC, IWRS, eCOA/ePRO etc.). All services are underpinned by strong clinical and biometrics project management with offices located in Europe, the USA and India.

Services

Clinical

Protocol & Study Design, Evidence-Based Feasibility, Clinical Project Management, Clinical Monitoring

Regulatory Affairs

Clinical, Pharmacovigilance

Data Management Solutions

DMP, CRF Design & Review, Query Management, Database Build and Validation, Medical Coding

Biostatistics & Programming

SAP, Blind Review, Randomization, Sample Size Calculation, ISS/ISE, Analysis & Reporting, CDISC Mapping, Adaptive Trial Design
