

SENIOR STATISTICAL PROGRAMMER

JOB POSTING #16-020-SSP

Job Department: Statistical Programming

Location: Chapel Hill

Job Type: Permanent, Full-time employment

Position Description:

To face increasing business requests and ensure US projects are properly realized and deadlines met, we are currently looking to strengthen the programming team in our US office. This role will also be responsible for managing communication with Sponsors and support development of Junior resources.

Principal accountabilities include:

- Production and validation of reliable statistical analysis using SAS
- Programming CDISC structured dataset
- Respect of project budget
- Leading projects
- Managing junior programmers

Ideal Candidate Profile:

- Experience writing and reviewing database specifications, using CDISC standards
- Experience of creating Define.xml and validation via OpenCDISC
- Experience of the CRO environment
- 3-5 years' experience programming datasets, tables, listings and figures from a statistical analysis plan

To apply for this position, send your CV, along with a cover/presentation letter, to hrcros@crosnt.com with "Research code 16-020-SSP" in the subject line.

ABOUT CROS NT: CROS NT is an international Contract Research Organization (CRO) specialized in biometrics services including Biostatistics methodology, programming and analysis, Clinical Data Management, Medical Writing and Clinical Technologies (EDC, ePRO, IWRS, CTMS).
