

Senior/Principal Biostatistician

Job Department: Biostatistics

Location: Office based in Chapel Hill, NC or part office/part home-based

Job Type: Permanent, Full time

Position Description:

As a Senior/Principal Biostatistician, you will hold a combined technical and project leadership position. Working as part of the global Biostatistics team, you will deliver, lead and project manage assigned studies across Phases I-IV in a variety of therapeutic areas.

Principal responsibilities include:

- Deliver and lead assigned studies ensuring quality standards and timelines are met
- Prepare and review Statistical Analysis Plans and specifications
- Write and review statistical methodology and results sections of reports
- Perform sample size calculations
- Review statistical analysis (tables, figures and listings), including validation support if required
- Provide statistical input to the design and review of Protocols and Case Report Forms
- Prepare and deliver training for staff and clients on statistical methodology and principles
- Deliver presentations and manage technical communication with clients

Skills and Experience Required:

- Master's degree in Statistics or related field
- Substantial clinical trials experience, CRO experience strongly preferred
- Demonstrated experience in methodological biostatistics
- Previous project leadership experience
- Good SAS programming skills
- Excellent English communication skills, both written and verbal, and organisational skills

To apply for this position, send your CV, along with a cover/presentation letter, to careers@crost.com with the job position in the subject line.

CROS NT CAREERS

As a global Contract Research Organization (CRO), CROS NT enhances clinical trial outcomes and optimizes vendor oversight with data-driven services and solutions.
